

After many years of back pain I reached a point last July where I could not walk or stand without intense pain. My personal life and work life came to an abrupt halt. After undergoing an MRI it was determined that my best option was surgery. Dr. Reames' staff as well as other employees at The Neurological & Spine Institute went above and beyond to fit me into his busy schedule. They were always kind, compassionate and accommodating. Surgery itself was much easier than I expected.. Everything was carefully explained to me and went as anticipated. I woke up with minimal surgical pain and the debilitating back pain was gone. After surgery and at my follow up visit everyone continued to fully explain details about the recovery period and answer any questions I had. I am very grateful to Dr. Reames and his staff.
